

MOM INSPIRED. HOSPITAL TRUSTED.

HygieniKit™ Milk Collection Systems

Ameda HygieniKit Milk Collection Systems are designed to work specifically with all Ameda breast pumps. Our HygieniKit System has the world's only Proven Airlock Protection™ feature reducing risk and simplifying pump use and care.

- Proven Airlock Protection™ prevents air flow between expressed milk and tubing while pumping. Without the barrier, mould and bacteria easily grow in breast pump tubing when moisture becomes trapped inside it. Its solid barrier keeps narrow pump tubing dry so no need to clean or replace it
- Sterile, pre-assembled and ready to use, reducing setup time
- Converts easily to a manual pump with One-Hand Breast Pump Adaptor for more pumping options
- Pumps directly into any standard-thread bottle or milk freezer bag to reduce the risk of contamination from milk transfer
- Single or double pumping options to meet a mother's different needs
- All HygieniKit Systems attach the same way to all Ameda electric breast pumps, requiring less instruction and inventory

Eco HygieniKit™

The Ameda Eco HygieniKit™ is a single, sterile unit.

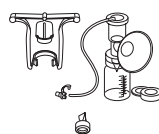

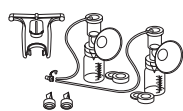

Eco HygieniKit™ is autoclavable at 134° for 5 minutes.

The tubing adaptor, tubing and adaptor cap do not require cleaning as they do not come into contact with mother's collected milk.
